

Poster / Brochure Order Form 2008

 <p>Bare Sand Island Sea Turtle Research Project</p> <p>Each year between July and October 1000-1500 sea turtles lay their eggs on the beaches of Bare Sand Island. These eggs are the start of a new generation of sea turtles. The eggs are laid in a protective nest and are guarded by the mother for up to 60 days. The eggs are then buried in the sand and the mother returns to the sea. The eggs are then guarded by the mother for up to 60 days. The eggs are then buried in the sand and the mother returns to the sea. The eggs are then guarded by the mother for up to 60 days. The eggs are then buried in the sand and the mother returns to the sea.</p> <p>Beach Top watching sea turtles</p> <p>It is a great way to see sea turtles in their natural habitat. You can see them from the beach and watch them lay their eggs. You can also see them from the air. This is a great way to see sea turtles in their natural habitat. You can see them from the beach and watch them lay their eggs. You can also see them from the air.</p>	<p>Number ordered _____</p>
